

# Timothy Hurdelbrink

## Project Executive

---

Tim has over 25 years of experience on construction operations teams, building his career through positions of increasing responsibility. Since his college days when he worked summers at his father's paint factory, Tim has an appreciation for working with his hands, and carries that fundament with him to this day.

During those 25 years, Tim has worked on a diverse portfolio of projects ranging from laboratories at Marine Biological Laboratory to vertical expansions at Rhode Island Hospital and Tufts University School of Dental Medicine to renovations on campuses across New England for clients such as Phillips Exeter, Dana Hall School, and Babson College. This variety of work provides him with invaluable hands-on knowledge of the strategies that help us best address key construction challenges regardless of the structure or setting. From tight urban areas to sensitive healthcare and private school environments, Tim is a respected professional with the skills necessary to build projects on paper in the pre-construction process and minimize any risks during construction.

Tim received his B.S. in Civil Engineering from the University of Illinois in Champaign, IL. He also has his Boston Builder's License – A, B, C, Cambridge Builder's License, is 10-hour OSHA Certified, ASHE Healthcare Construction Certified, and is a LEED® Accredited Professional.
