

Edwin W. McCleskey, PhD

Ed McCleskey is a Scientific Officer of the Howard Hughes Medical Institute. Prior to joining HHMI, Dr. McCleskey was on the faculties of the Vollum Institute for Advanced Biomedical Research (1993–2007) at Oregon Health Sciences University and the Department of Cell Biology and Physiology at Washington University (1987–1993). He directed MBL's Neurobiology course from 2004–2007. His research concerns bioelectricity, most recently finding the molecular triggers for ischemic pain such as angina.
